We design and manufacture premium industrial steel doors and panels.

The timeless industrial design of our products create a great balance between form and functionality, whilst ensuring the best use of natural light.

We offer solutions for both standard as well as custom dimensions. The sizes can be adjusted to match the conditions and functionality of the buildings.

Our products include:

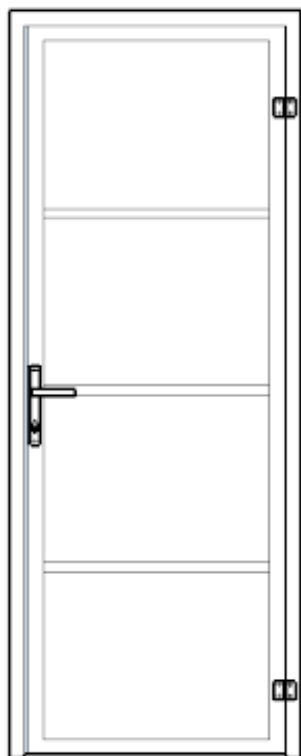

- Swing doors
- Sliding doors
- Doors with fanlights
- Partitions (also mixed with the above)

Our products provide a modern and sophisticated look for any setting. The mix of different materials and high quality craftsmanship provides a practical and elegant solution for any kind of space.

We use slim and strong steel profiles that helps us create refined final products that are built to last. By paying great attention to detail and carefully executing the finishes we ensure that we only offer premium products.
