

# PVC WINDOWS

**WIŚNIEWSKI**

GATES | WINDOWS | DOORS | FENCES

## WINDOWS DEVELO

**Intended use:** PVC windows are intended for residential housing, industrial buildings, and public utility facilities.

### THERMAL INSULATION

Thermal transmittance factor of the entire window from as low as 0.78 W/m<sup>2</sup>K for the DEVELO window. The values apply to the window size 1,230 x 1,480 [mm].

### SAFETY

Unwelcome guests? Not in a house with WIŚNIEWSKI windows. Their precise structure ensures high resistance to breaking and entering.

### WARRANTY

WIŚNIEWSKI windows are covered by a 5-year warranty. This is just to be on the safe side, but we want you to know that you can count on us.

## PVC WINDOWS CAN BE GROUPED AS FOLLOWS:

- according to the number of leaves: single-leaf, double-leaf, three-leaf, multi-leaf,
- according to the opening method: fixed windows, turn-only (side hung) windows, tilt-only (awning/hopper) windows, tilt and turn windows, turn and tilt windows, tilt and slide patio door, lift and slide patio door.

## DEVELO STANDARD, MODERN

### WINDOW CHARACTERISTICS:

- 6-chamber profiles, installation depth 76 [mm]
- Non-flush with the frame – straight
- Invisible effect (seam) profile joint, multi-chamber structure ensuring high thermal and acoustic insulation
- An arrangement of three gaskets (outer, central, and inner) perfectly insulates from noise, humidity, and cold
- Fitted as standard with a two-chamber glazing unit 4/18/4/18/4  $U_g = 0.5$  W/m<sup>2</sup>K in acc. with EN 673, optionally a panel 24-48 [mm] thick infilled with XPS extruded polystyrene
- Glass units 24 [mm] to 56 [mm] thick can be used
- Reinforcement made of galvanized steel: frame 1.5 [mm], hollow steel section, white leaf, film coating up to 2 [mm], gasket extruded with a profile
- Heat bonded gasket is available in the following colours – black, grey.
- Profile core – double-sided film coating: anthracite
- Sound reduction index  $R_w = 37$  (-2;-7)
- Thermal insulation RU of the reference window, dimensions 1.23 [m] x 1.48 [m], RU:  $U_w = 0.78$  W/m<sup>2</sup>K with a 3-pane glass unit  $U_g = 0.5$  W/m<sup>2</sup>K
- The DEVELO window is available: with a low threshold (DEVELO with a low threshold), as PSK tilt and slide patio door

### MODEL VERSIONS

STANDARD

MODERN

## STANDARD WINDOW ACCESSORIES

- drive gear with a lifting mishandling device and leaf lifter,
- all moving rollers i.S.,
- alloy strikers, additionally, the U, R and RU leaf features two anti-burglary strikers,
- in RU leaves, bottom striker plate as standard,
- microventilation in scissor stay,
- surface hinges with contact pressure adjustment in three dimensions,
- anti-draught lock in RU leaves,
- aluminium handle,
- infilled bottom hardware groove opening frame,
- the standard glass unit for the DEVELO system is 4/18/4/18/4  $U_g = 0.5$  W/m<sup>2</sup>K in acc. with EN673,
- 5-chamber transport and installation bar,
- band handles for handling windows,
- installation anchors,
- in balcony windows: balcony catch – as standard from the height of 1,951 [mm] in the groove (leaf height from 1,991 [mm]) with an aluminium pull,
- widening system 25 [mm] in white for balcony windows with a low threshold,
- transport slides

# DEVELO PSK

### PARALLEL SLIDING DOOR

Available in the PSK-S, PSK-Z, and PSK-PAS versions. The running system track is installed in the bottom section of the opening frame, which makes it visible to the user. The carriages are installed on the inner side of the sliding leaf.

**PSK-S STANDARD VERSION** – manually operated, parallel tilt and slide door without motor support.

**PSK-Z AUTOMATIC VERSION** – automated, parallel tilt and slide door. This system features an additional control function “in the handle,” which makes it easier to tilt, slide, and close even very heavy leaves, and the integrated catch system enables easy transition between the sliding and tilting position.

**PSK-PAS PARALLEL-STOP-SLIDE VERSION** – the PSK-PAS system enables three functions: sliding, latching, and gap ventilation – parallel action gap up to 6 [mm] from the frame. The built-in damper stores the energy and allows the sliding door to be easily closed shut.

## NON-STANDARD SHAPES

For technological reasons, the non-standard shaped windows are not manufactured using the V-Perfect technology.

Minimum permissible angle $\alpha$ LEAF R, RU	65°
Minimum permissible angle $\alpha$ , with a groove milled in the frame, LEAF R, RU	55°
Minimum permissible angle $\alpha$ for welding profiles FIXED FRAME	30°
Minimum permissible angle $\alpha$ for welding profiles FIXED LEAF	40°

Minimum length of the welded sections of the frame/leaf for non-standard shape windows: 250 [mm]

The minimum height of the shorter side is $\frac{3}{4} H$ of the total window height	
Minimum permissible angle $\alpha$ LEAF R, RU	140°

Minimum length of the welded sections of the frame/leaf for non-standard shape windows: 250 [mm]

Minimum permissible angle $\alpha$ LEAF U	65°
Minimum permissible angle $\alpha$ , with a groove milled in the frame, LEAF U	55°
Minimum permissible angle $\alpha$ for welding profiles FIXED FRAME	30°
Minimum permissible angle $\alpha$ for welding profiles FIXED LEAF	40°

Minimum length of the welded sections of the frame/leaf for non-standard shape windows: 250 [mm]

## SYSTEM LIMITATIONS

### Structural limitations for the DEVELO windows

#### Maximum leaf dimensions

9	F 470-3004	Woodec Turner Oak Toffee	grey	black	F4	RAL 8019

## OPTIONAL ACCESSORIES

### TILT-FIRST – tilting before turning

This solution is aimed at locking the leaf in the tilted position after rotating the handle by 90 degrees to the horizontal position, which prevents the leaf from moving from the tilted to the open position. Only after the handle is unlocked with a key, can the window be opened. This solution provides safety for children and at the same time makes it possible to ventilate the room with the window tilted.

### Opening restriction

Prevents excessive opening of the leaf and thereby prevents the leaf from hitting the reveal. Opening restriction can be used both with surface and concealed MultiPower hinges. Cannot be used with a window version with the SECURITY enhanced burglary resistance.

### Turn restrictor controlled with a handle

Prevents self-acting opening and closing movement of the leaf. The turn restrictor can be used both in the R and RU version, as well as with concealed and surface hinges.

This turn restrictor version cannot be used:

- with a low threshold,
- with SECURITY classes,
- with the UR option (tilt before turn).

### Brake stay

Fixes the opening angle of the leaf in the desired position. The brake stay can only be used in the R window version, but it cannot be used with a low threshold and with the SECURITY enhanced burglary resistance window version.

## SAFETY PIN

Safety Pin secures each turn-only (side-hung) and turn and tilt window against leaf unhinging from the frame caused by mishandling. Located on the hinge side, the security device is integrated with the central turn and tilt locking system. The spring-loaded steel wire prevents the window leaf from falling out of the frame and effectively prevents potential accidents.

The device is recommended for windows in residential buildings, as well as in children's rooms and nursing homes; these devices should be considered standard accessories in public buildings.

## Comfort scissor stay

Problem-free operation of the window, primarily when windows are difficult to access, thanks to the handle in the bottom part of the window leaf.

The comfort scissor stay can only be used in the RU window version, it cannot be used with concealed hinges.

### Benefits for the customer:

- The window tilts and closes automatically with the use of a handle.
- Meets the requirements of elderly and disabled persons.
- Enables operation of windows which are difficult to access.
- Optional electric assistance.

## Contact

Flush-mounted, wired

Windows can optionally be fitted with an electronic closure monitoring system. Window contacts are connected to the monitoring system which triggers an alarm when the handle is rotated or the hardware is moved in any other way. The sensors operate regardless of whether the leaf was opened to the tilted or turned position. Available in a wired version, flush-mounted.

### Balcony door catch with a pull

Balcony door catch with a pull increases the functionality of balcony doors, making it possible to close them from the outside.

Balcony door catch with a pull

### Hardware with the SECURITY 1, SECURITY 2 burglary protection class

The SECURITY windows are available with the following structures:

- turn and tilt (RU);
- tilt-only (hopper/awning) (U);
- with a low threshold;
- with a moving mullion;
- tilt and slide (PSK) – PSK Standard and PAS – up to class SECURITY 2 scheme A;

Optional accessories, which can be ordered with the SECURITY 1 and SECURITY 2 burglary resistance windows:

- balcony catch,
- surface hinges (MultiMatic),
- wired contact switch,
- SafetyPin,

Other accessories are not available with the SECURITY burglary resistance windows.

### Air inlets

**Aereco EMM humidity sensitive air inlet**

Available colours: RAL 9003, RAL 8017, RAL 8001, RAL 7045, RAL 7016

**Aereco AMO pressure sensitive air inlet**

Available colours: RAL 9003, RAL 8017, RAL 8001, RAL 7016

**Aereco EXR 409 humidity sensitive air inlet**

		Air inlet closed	33 (0; 0)	Air inlet closed	34 (0; 0)	Air inlet closed	41 (-1; -1)

### Glazing bars

If inner glazing bars are used, silicone discs are not provided at the glazing bar intersection. The “glazing bar ringing” effect can occur, which is caused by normal vibrations of the aluminium glazing bar rod during opening and closing, or even by wind gusts outside.

**Glazing bar types and colours**

Glazing bar type		Colours	Restrictions
<b>INNER (colour on both sides)</b>	Inner glazing bar 8 [mm]	White 9010	The maximum length of an inner glazing bar without support = 700 [mm]
		Golden	
	Inner glazing bar 18 [mm] and 26 [mm]	White 9010	
		Golden	
		Walnut	
		Dark Oak	
		Golden Oak	
		Mahogany	
	Inner glazing bar 45 [mm]	Other colours available in the profile range	
		White 9010	
<b>INNER (colour on one side)</b>	Inner glazing bar 18 [mm] and 26 [mm]	Golden Oak	
		White / Walnut	
		White / Dark Oak	
		White / Golden Oak	
		White / Mahogany	
		White / 8014	
		White / 8017	
		White / 8022	
Other colours available in the profile range			

**Glass panes**

When using glass 4 [mm] thick – the maximum side length can be 2,500 [mm] (maximum side ratio 1:6), maximum surface area up to 3.35 [m<sup>2</sup>].

The above standard dimensional limitations apply only to clear glazing units installed vertically in locations where increased wind loads do not occur.

The limitations do not take into account the effect of coatings reflecting heat on the increase of the temperature inside the glass units and the effect of the changes in atmospheric pressure resulting from fitting in mountainous areas.

The permissible glass sizes do not take into account the customer’s detailed requirements regarding safety, wind load, etc.

When using varying thickness of glass in the glazing unit, the maximum surface is determined for the thinner glass.

In accordance with the regulations of the Building Law, safety glass should be used in the bottom section of the window up to the height of 850 [mm] (in buildings up to 25 [m] high) and 1,100 [mm] (in buildings over 25 [m]).

**Warm edge**

Available in the following colours for the PVC range:  
Light Grey 7035, Grey 7040, Black 9005, Light Brown 8003, Brown 8016, White 9016

# Window handles

PVC windows are fitted with BASIC handles as standard.

double-sided handle for  
roller shutter

available colours:

## Clear passage

### Clear opening with a double-sided handle – PSK

In the case of a double-sided handle in the PSK with fixed glazing in the frame, we use a double-sided handle for roller shutter and the leaf is moved fully behind the fixed glazing. However, in the case of the PSK with fixed glazing in the leaf, we use a “standard” handle and at the same time, the leaf bumper is positioned so that it decreases the clear opening passage by 232 mm.

## Handle heights

Handle height [mm]	Range of application/ height in the hardware groove		Range of application/ leaf height in the window	
	MIN. [mm]	MAX. [mm]	MIN. [mm]	MAX. [mm]
<b>146</b>	360	430	402	472
<b>211</b>	431	660	473	702

## GEZE OL90 toplight opener

Tilt-only (hopper/awning) windows

### Methods of window opening with the GEZE OL90 hardware

Lever

Crank

**Method of drive transmission with GEZE OL90**

Flexible transmission

Articulated joint transmission

**With the use of:**

- manual lever,
- Fz91 gear unit installed under the elastic cable

**With the use of:**

- crank mechanism.

**Product features**

- Full opening width = 170 mm for all leaf heights,
- Adjustable opening width,
- Total leaf weight up to 80 kg,
- Min. height of the leaf 250 mm,
- Max. width of the leaf 380 mm,
- Max. width of the leaf 3,600 mm with three scissor stays,
- Little space requirement due to flat scissor stay construction,
- Release inhibitor, lockable manual lever and scissor stays ensure added security,
- Scissor stays can be disengaged with a release button for easy window cleaning inside and outside,
- Fully pre-installed mounting groups for easier fitting,

**Areas of application**

- Convenient everyday ventilation of rooms and staircases,
- Inswing windows,
- Can be used in non-standard structures, i.e. arched, triangular, round and segment windows,
- Connecting and operating several windows with an angular drive transmission.

Balcony coupling mini 3310

Connector 116.230  
only available in colour on both sides

Connector KP14 14636 and KP13 15122

### Widenings

For the DEVELO windows

Widening KPP 10 5307

Widening KPP 25 12157

Widening KPP 50 5300

Widening KPP 100 5301

### Accessories and delivery

The windows are assembled and ready for fitting (optionally with opening frame holes for direct mounting and steel anchors for indirect mounting). The windows are delivered in one piece. Large windows consisting of two or more elements are disassembled into parts for shipping. The glass for the HS patio door is delivered in transport frames.

### Ordering and installation dimensions for windows and PSK

Drilling for wall plugs is an option and is performed in accordance with the customer's requirements. Wall plug hole diameter –  $\varnothing 6$  [mm]. In the order, please provide the H dimension, without the 30 [mm] undersill strip.

### Wall plug hole spacing

For white and colour profiles

### Dowel hole spacing in the SECURITY anti-burglary version

For white and colour profiles

Marking for wall plugs is an option and is performed in accordance with the customer's requirements. Wall plug hole diameter -  $\varnothing 6$  [mm].

### Pricing guidelines

- All the versions are presented as seen from the inside,
- Standard hardware for windows: Maco MultiMatic,
- Each structure includes a transport and installation bar,
- In window leaves, the RU function is always used for calculation. When pricing structures which are not listed in the price list, please contact the Sales Department.
- We reserve the right to estimate the final value and determine the feasibility of production of the joinery.
