## KeyGo io

With one KeyGo io almost all functions of the Dexxo Smart io can be controlled using the 4 channels:

- Completely opening/ closing
- Partial opening
- Control integrated lighting
- Control external lighting

# The most efficient features

1

## Error-free installation

Quick and easy

- Detachable connectors with colour codes for quick connecting of accessories
- 230V and 24V zones clearly separated
- The LED lights give direct feedback about the status of the accessories.
- Dedicated Prog button for setting the 4 features that can be controlled by the KeyGo io remote control
- Simple use the 'Set', '-' and '+' buttons to change all the parameters

2

## Integrated LED light

More than just a light

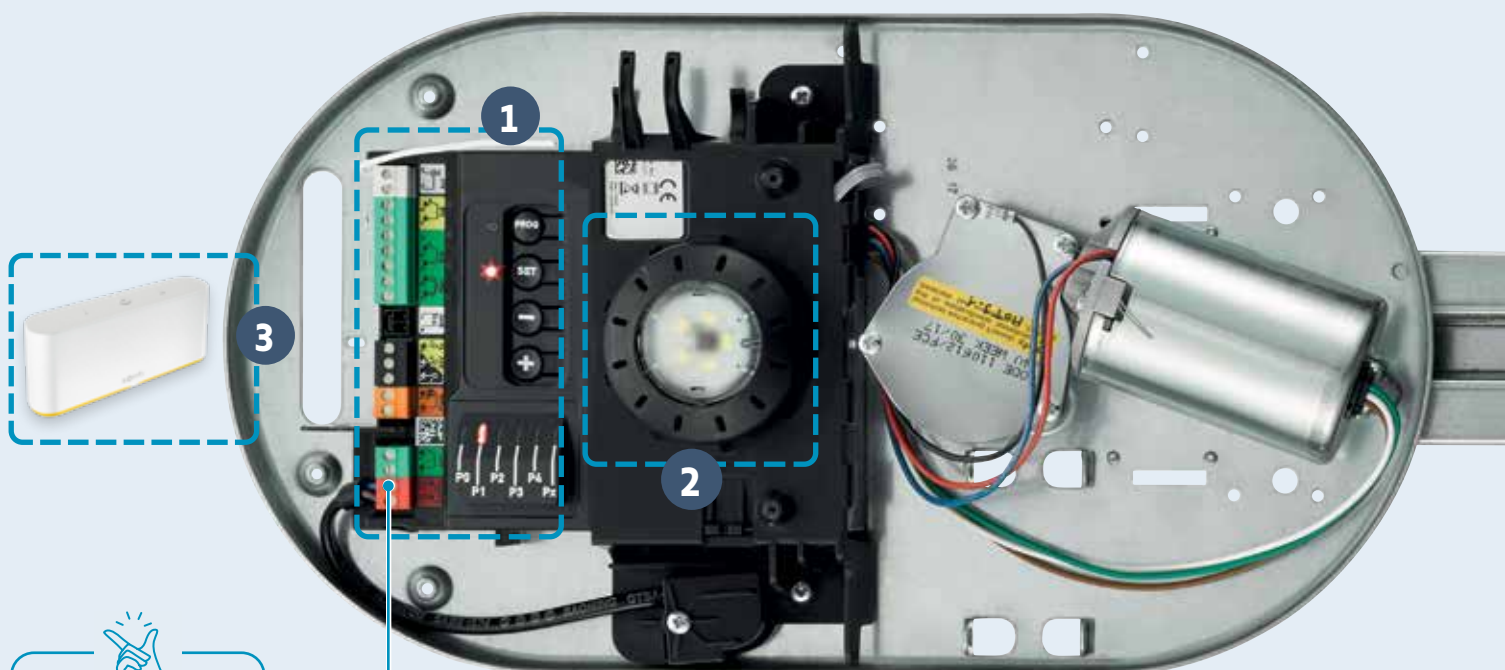

- The LED light turns on during movement of the door
- During installation the LED light is less bright than during normal use for a more relaxed installation
- The LED light is separately operable with the KeyGo io remote control

3

## Connected solutions

Get connected

- Expand a standard motorised garage with connected solutions
- With these solutions you can offer your customers a complete solution and become unique in a highly competitive market!

## Lighting

Designated output for remote lighting. Automatically switched on with the garage door, and operated separately.

## Applications

 Till 15 m<sup>2</sup>

# Dexxo Smart io

## Specially designed to the needs of the professional and customer

### LED integrated lighting

This fine LED light ensures good visibility in the garage and dims during installation to make it easier to work

### Battery

In the event of a power failure, the motor can continue to operate with the back-up battery (optional)

## Lighting

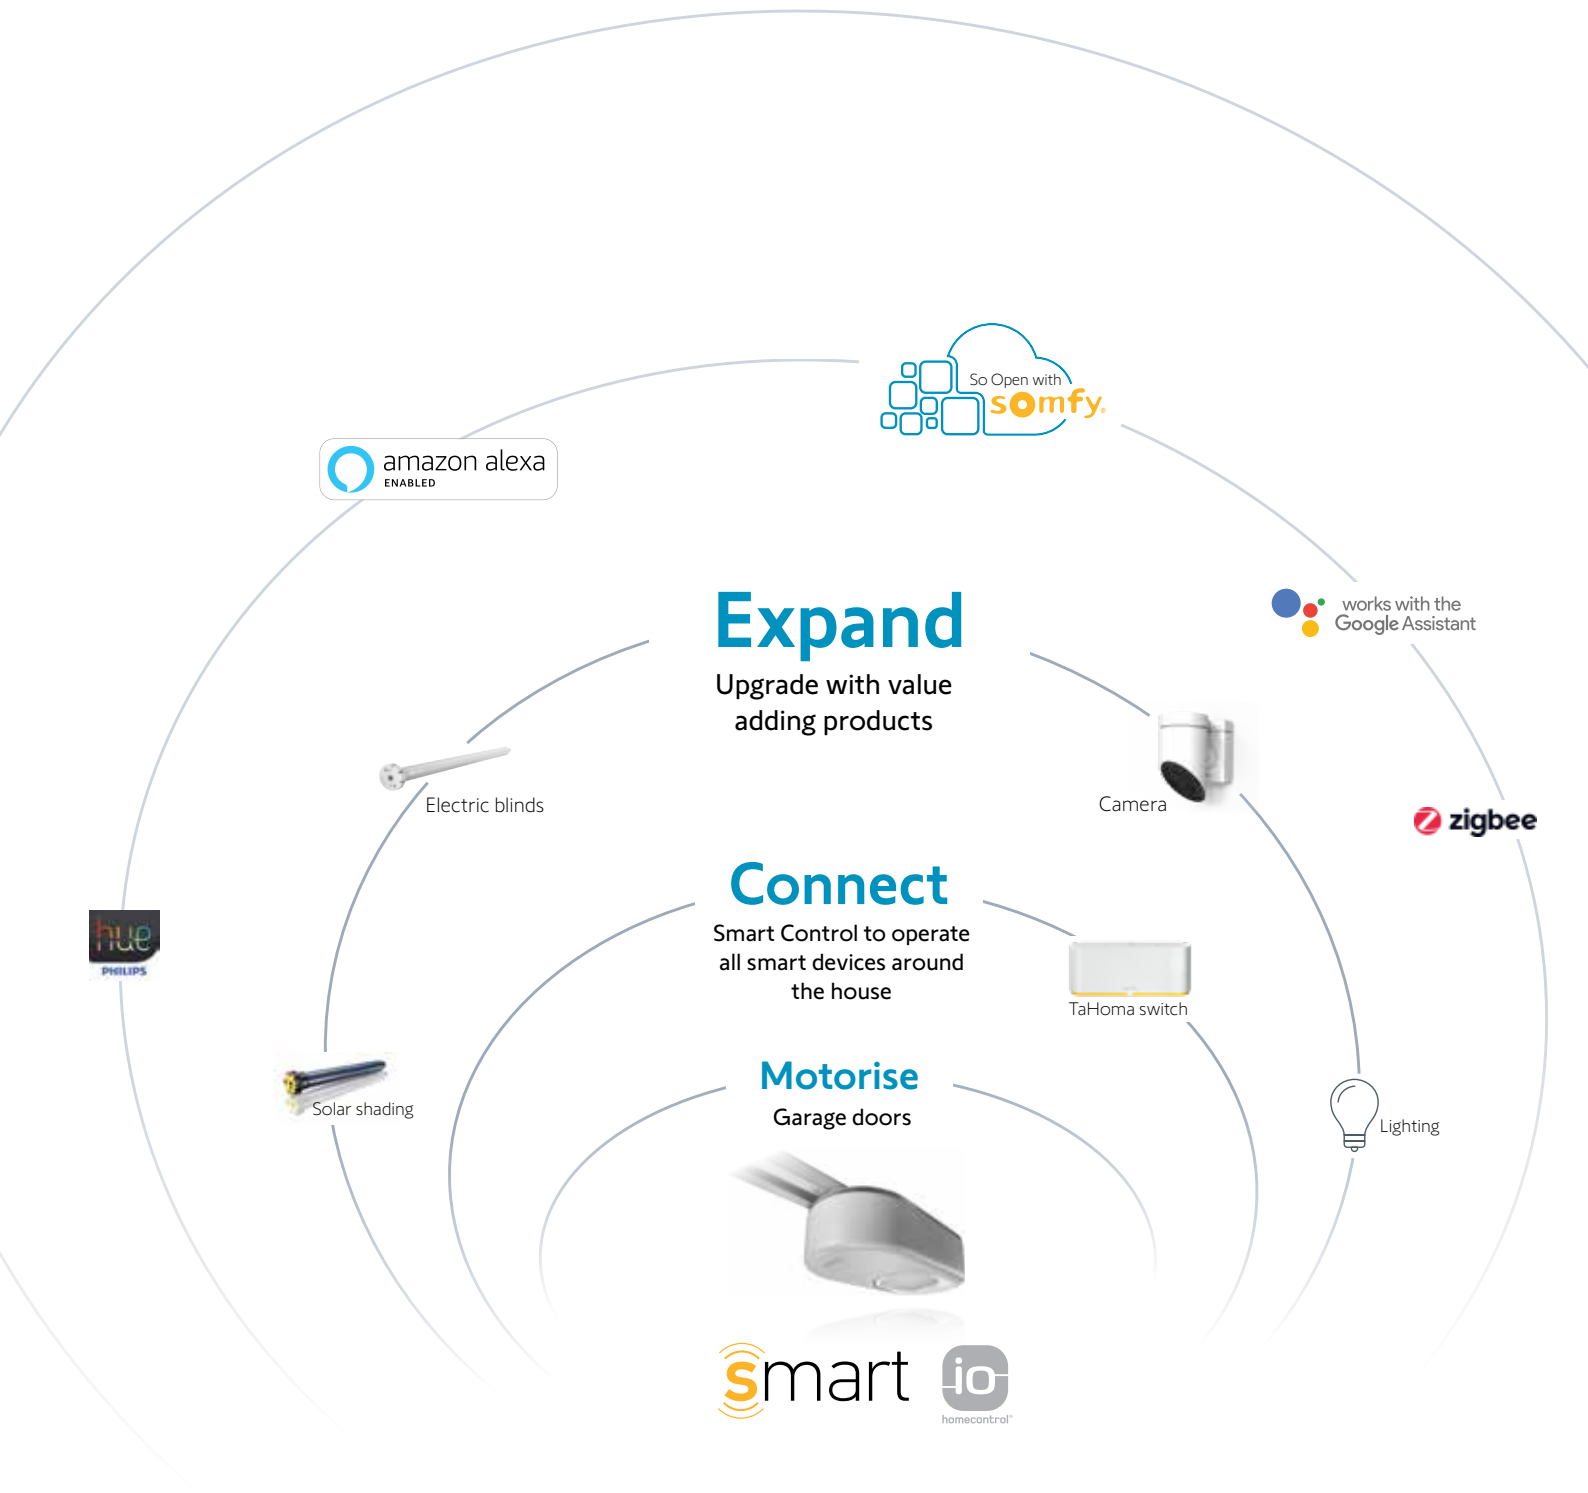

Offer your customers a remote control they can always use whenever, wherever they are.

## Fast & simple

The new ergonomics on the electronic board gives the installer a worry free installation opportunity. All plugs are detachable and coded by number and colour for simple and intuitive installations.

## A complete, unique open eco-system

A customised installation based on your users' needs, Dexxo Smart io is compatible with a number of accessories to enhance your and your customers' comfort and security.

Adding other connected devices, such as lights, cameras or alarms allows you to create a unique offer.

The Somfy advantage: TaHoma, the most complete system for easy, simple and scalable control of all equipment in the house. TaHoma is compatible with \*all Somfy products and those from major domestic equipment brands\*\*. TaHoma is also open to the main global services platforms: IFTTT, Amazon Alexa, etc.\*\*

\* With some Somfy products there is limited compatibility. \*\* Availability depending on country.
